The Pocono Wildlife Rehabilitation Center is a refuge where injured or orphaned wildlife critters are cared for until they are healthy enough to be released into their natural habitat. When these animals’ injuries are too debilitating for release they often become educational ambassadors used to show live wild animals up close and personal and to focus on the natural history of our local wildlife.

DON’T MISS THIS FANTASTIC “FREE” WILDLIFE PROGRAM!!

Bring the whole family to see the trout stocking, animals and have dinner.

Hot dogs, burgers, beverages will be available between stocking and program, 5:30-6:00 pm
